

# Acoustic Emission Technology Workshop

Join us for an overview of this technology and learn how it can support your application

## Dates & Locations

**Minneapolis, MN**  
November 6, 2008

**Arlington, VA**  
November 18, 2008

**Charlotte, NC**  
November 20, 2008

**Cincinnati, OH**  
December 11, 2008

**Los Angeles, CA**  
January 8, 2009

**Dallas, TX**  
February 18, 2009

**Orlando, FL**  
March 12, 2009

**Wichita, KS**  
March 24, 2009

**Phoenix, AZ**  
April 9, 2009

**Boston, MA**  
April 21, 2009

This **FREE Workshop** runs from 8:30AM to 11:00AM and includes breakfast and course materials.

Please be our guest and learn about Acoustic Emission (AE), a powerful inspection method that quickly checks materials and structures for defects.

You will learn from Physical Acoustics Corp. (PAC), a member of MISTRAS Group's Software and Products Division, a world leader in Acoustic Emission technology and application integrity.

Acoustic Emission Non-destructive testing systems are used all over the world to evaluate materials, processes and systems.

### What You Will Learn:

- The physics of how, why and where AE works
- How to integrate this testing technology into your organization
- Applications and Case Studies

### Who Should Attend:

- Engineers
- Scientists
- Researchers
- Design Personnel

This hands-on workshop will give you the fundamental knowledge to use AE in your organization.

*Hands-on Workshop instructed by one of our Senior AE Practitioners*
